

ADDENDUM No. 3
LAUDERDALE-BY-THE-SEA ITB 15-07-01
Holiday Lighting

Additional Information after August 6th Walk-Thru

1. The lights must be attached to the trees by any non-obtrusive method which doesn't penetrate the tree, thus no nylon staples
2. The small trees referenced throughout should have their canopies lit with miniature white soft/warm lights – and the trunks wrapped per specs.
3. The proposed placement of the palm trees and pigeon plums in the blocks between Ocean Drive and Seagrape Drive on Commercial Blvd. are attached. As these are the “proposed” plans, they may change depending on conflicts which may be encountered. The plans are as of 8-6-15.
4. Since the exits and entrances to the shopping plazas are not planted with similar quantities of plants, please disregard the requirement to have lighting in those areas.
5. Scope # 3-15 small trees and foliage at the base – include the SW & NW corners of El Mar Drive & Commercial Blvd.; NE & SE Commercial Blvd. & Ocean Drive low foliage with red lights
